

Quick Start Guide

Everything you need to sign in and run your week on the LVL/PSK EOS Platform.

Rolling out with HODs first. You're in the first group on the platform. Once we've gathered your feedback and seen how it runs in practice, we'll open it up to your teams — so use it hard and tell us what's missing.

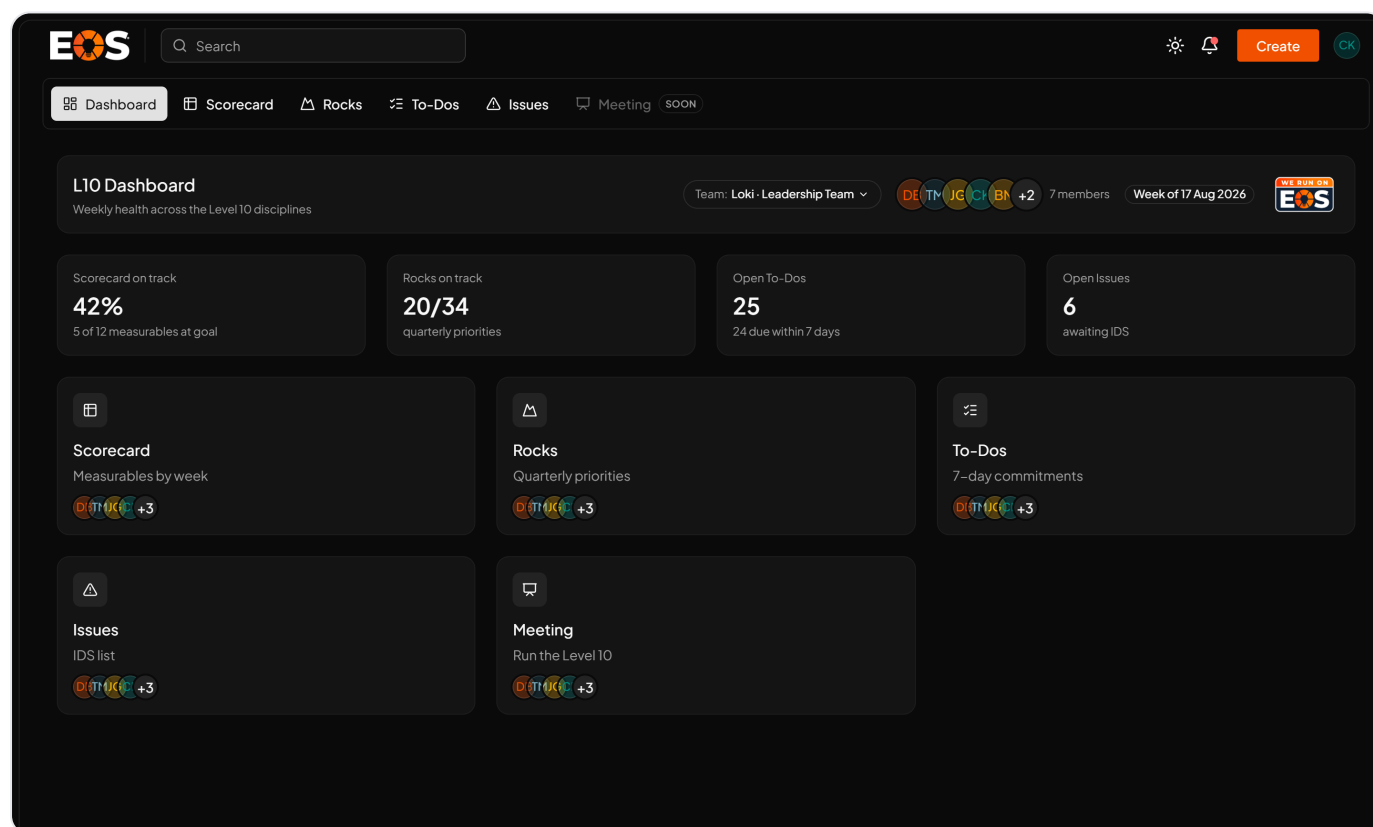

1 Signing in for the first time

1. Go to <https://eos.rnd-loki.com/l10/login> (the button in your invite email takes you there).
2. Enter your **work email address** and the **one-time password** from the invite email.
3. You will be asked to **set your own password** before continuing — choose something only you know (6+ characters).
4. That's it — you land on the Dashboard. Next time, sign in with your own password.

Forgot your password? Use **Forgot password** on the sign-in page and a reset link will be emailed to you. It expires in 1 hour.

2 The Dashboard — your week at a glance

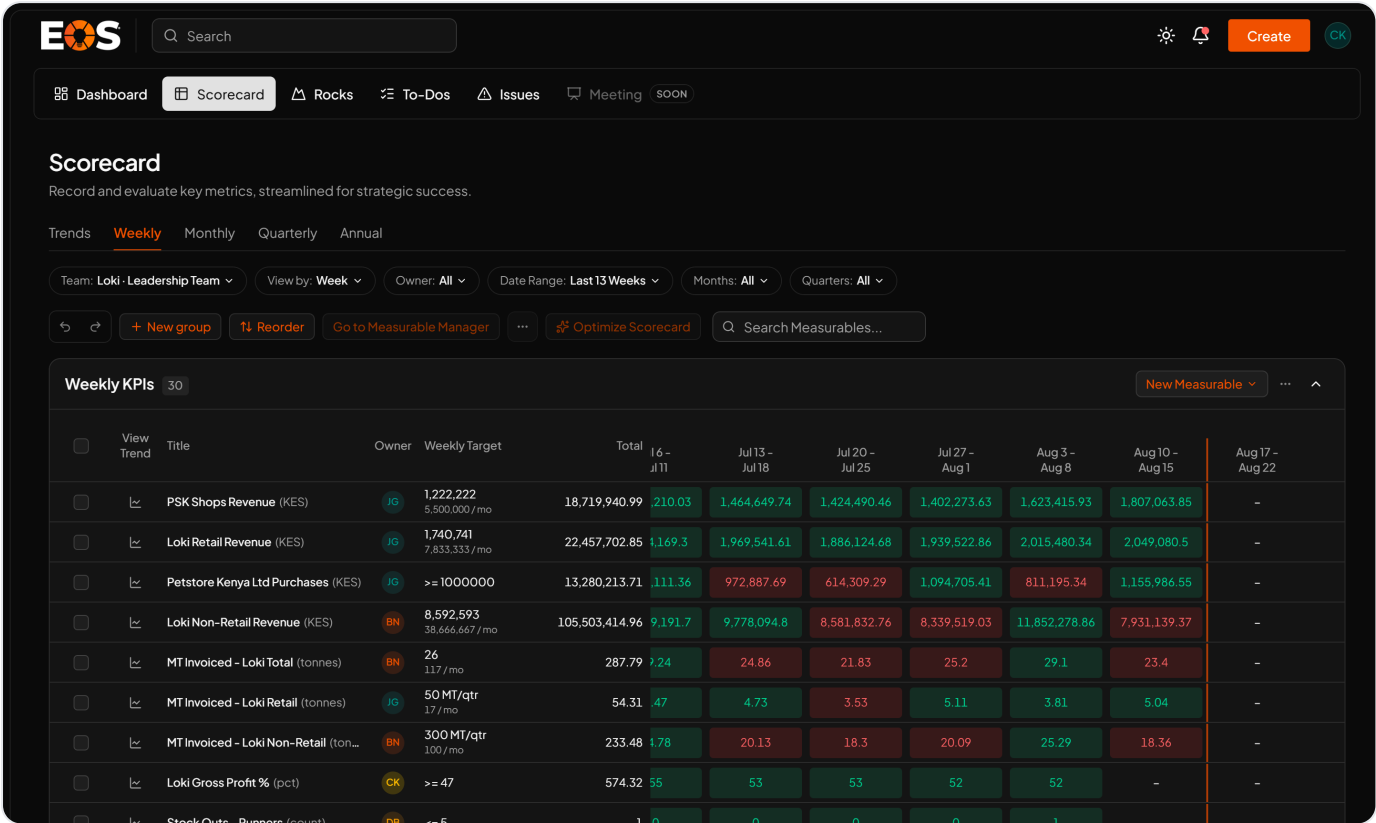

Scorecard status, rocks progress, open to-dos and issues, all in one view. The tabs along the top take you to each module.

The Dashboard. The greyed-out **Meeting · Soon** tab is the guided meeting mode, still in development.

3 Scorecard — measurables by week

The measurables you own, at weekly, monthly, quarterly and annual cadence. Enter your number for the week and it is instantly scored against goal — green on-track, red off-track. **AUTO-SYNCED** rows fill themselves (see section 4).

Weekly KPIs — revenue and tonnage rows here are synced from SAP automatically.

4 What fills in automatically

These measurables are wired directly to SAP B1 / the data warehouse and refresh **automatically about every 3 hours** — no manual entry needed:

- **Revenue** — Loki Retail, Loki Non-Retail, PSK Shops
- **MT Invoiced** — Retail, Non-Retail, Total (tonnes)
- **Returns** — Actual Returns (KES & count), Credit Notes – Other (KES & count)
- **LPO Fulfillment** and **PSK Purchases**
- **Finance** — Accounts Receivable & Payable, DSO, Gross Profit %
- **Supply chain** — Pending dispatch (Retail / Non-Retail / Up-Country), pending prep, stock-outs (Runners / Repeaters / Strangers), in-house damages, expiry-risk SKUs

Every other measurable is entered by its owner each week — that's the discipline the scorecard runs on.

5 Rocks — quarterly priorities

Your 90-day priorities with milestones and due dates. Keep the status honest — **On Track** or **Off Track** — and tick milestones off as you complete them. The Trends tab shows completion history across quarters.

Benard Nyasimi

5

	Status	Title	Milestones	Due Date
>	On Track	Achieve Full NEMA Packaging Compliance for Q3 2026	—	30 Sept 2026
>	Off Track	Complete and Deploy ERP Next by 5 Aug 2026	—	5 Aug 2026

6 To-Dos & Issues

Issues — the IDS list (Identify, Discuss, Solve). Log obstacles as they come up so they get solved in the meeting, not forgotten.

Use the + **Create** button (top right, on every page) to quickly add a to-do, issue, rock or headline from anywhere.

7 What's live today & what's coming

Feature	Status
Dashboard, Scorecard (all cadences + Trends), Rocks (+ milestones & Trends), To-Dos (team & private), Issues (short & long-term)	LIVE
Automatic SAP data syncs (section 4), quick Create, password reset by email, phone & tablet access	LIVE
Meeting mode — guided Level 10 agenda that runs the weekly meeting end-to-end	IN DEVELOPMENT
Team rollout — accounts for your team members, once the HOD phase has bedded in	PLANNED

8 On your phone — add it to your home screen

The platform works fully in your phone's browser — sign in once and you stay signed in for 30 days. Add it to your home screen and it opens full-screen like an app:

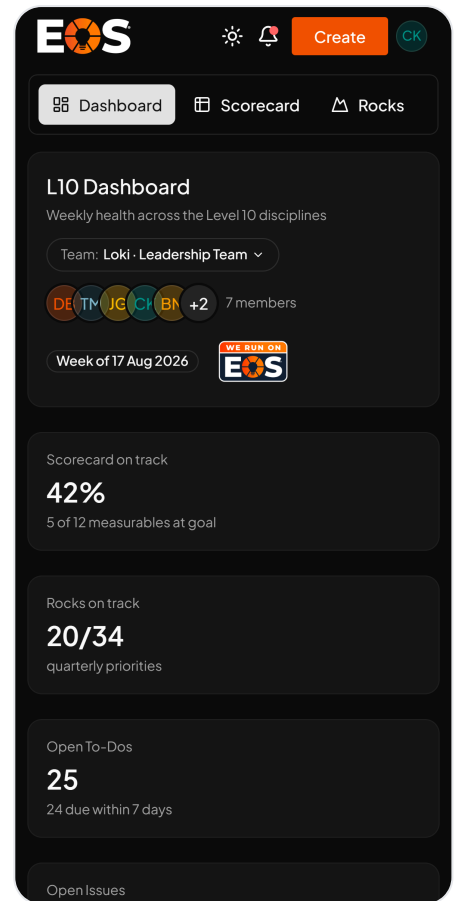

iPhone / iPad (Safari)

1. Open **eos.rnd-loki.com** in **Safari** and sign in.
2. Tap the **Share** button (the square with the arrow pointing up, bottom of the screen).
3. Scroll down and tap **Add to Home Screen**, then **Add**.

Android (Chrome)

1. Open **eos.rnd-loki.com** in **Chrome** and sign in.
2. Tap the **⋮ menu** (top-right corner).
3. Tap **Add to Home screen** (on some phones it says **Install app**), then **Add**.

An EOS icon appears on your home screen — tap it any time to jump straight to your dashboard.

The platform on your phone.

9 Your weekly rhythm

- **Before the meeting:** enter your scorecard numbers, update your rock statuses, and tick off completed to-dos.
- **During the week:** log issues as they come up — big or small.
- **Anywhere, any time:** the + Create button adds a to-do, issue, rock or headline in seconds.

10 Good to know

- You only see data for the companies and departments you have access to.
- Synced numbers are read-only — if one looks wrong, raise it as an Issue rather than working around it.
- Your feedback drives the roadmap: rate the app when prompted, or tell Dennis or Taha directly.
